# pinelog garden space for inspired living

Whatever your dream, wherever you live, the Pinelog Garden Space will provide a life enhancing experience for you.

With clean lines and tactile surfaces, it combines minimalistic styling with natural materials to create an inspired living space for your garden.

Built to the highest standards using redwood and larch from sustainable forests, all external timber is pressure treated to ensure a long life. The Garden Space has many environmentally friendly features such as insulation to walls and roof and large double-glazed timber doors and windows which encourage solar gain and minimise the need for electric lighting.

Pinelog Garden Space – a private, secure space that blends perfectly into gardens.
