

Oasis Pinelodges

Drawing inspiration from traditional waney edge barns, the Oasis lodge sits peacefully within its environment.

The organic curves of its real timber, maintenance free cladding, reflect the gentle shapes of nature itself.

This sustainable timber frame building is packed with high levels of insulation, tested for excellent air tightness and uses more natural timber in its construction than any other comparable building.

The Oasis is a luxurious and spacious home that truly is energy efficient and kind to the environment.

Internal walls in the Oasis lodge are finished in specially graded and finished white timber cladding. Whilst maintaining the integrity of a log cabin, this interior finish is also fresh and contemporary and provides a perfect backdrop for any style of interior decor.

Rooms are generously proportioned and each bedroom benefits from its own walk-in wardrobe, which means there's storage space to spare in this stunning lodge.

Low energy lighting is expected these days but this lodge also boasts a master key fob light switch. This means that all interior lights are switched off automatically when the lodge is not occupied. Water saving taps and showers are standard and the toilet operates on a miserly 2.6L flush.

The beautifully designed and fitted kitchen has solid timber doors that can be offered in a range of colours. A superb range style cooker is included along with energy efficient integrated washing machine and dishwasher. A central island unit provides additional workspace as well as housing an integrated fridge and freezer.

A full range of eco 'add-ons' has been developed for this and other lodges in the Pinelog range. You can choose from:-

- Sheepswool insulation
- Bamboo worktops
- Solar water heating
- Genuine wood burning stove
- Traditional cedar shingle roof tiles

...We can even supply sofas covered in fabric made from nettles!

Tall, elegant windows make the dining area feel like a conservatory and the relaxing lounge benefits from twin velux windows that let the sunshine in; the whole area is flooded with natural light.

Good design and correct orientation of windows and doors makes best use of the sun's natural warmth during the cooler months of the year resulting in less energy usage and lower fuel bills.

40' x 20' (12m x 6m) 2-Bedroom Oasis

45' x 20' (12m x 6m) 3-Bedroom Oasis

Pinelodges are made to order and we can offer modifications to size and design to suit your requirements. We can also design and build verandahs to complement your lodge. Please ask us for details.

Bathrooms in this lodge are truly luxurious. The superb family bathroom boasts a free standing, double ended bath and separate shower. Travertine style tiling protects wet areas.

Tiled floors are warmed by underfloor heating, towels are aired with heated towel rails and a humidistat automatically takes care of bathroom ventilation.
