

capture the dream

PINELOG INDOOR POOLS COLLECTION

capture the dream

Pinelog specialises in providing elegant, high quality swimming pools in natural timber buildings.

As the UK's leading swimming pool company, designing and manufacturing buildings in our Bakewell factory, we will efficiently and professionally manage swimming pool projects, taking care of everything from initial planning applications to final commissioning.

An indoor swimming pool at home is an investment in a lifestyle that you can enjoy every day, giving you and your family memories that last a lifetime. Your perfect indoor swimming pool takes time and expertise to create – it's an effort we would love to make for you, so you can capture your dream...

quality counts

There are many steps in the process of creating a distinctive swimming pool. All are undertaken by our own skilled designers and craftsmen, using traditional methods, the latest technology and the finest materials available. It is this attention to every detail that makes Pinelog swimming pools so very special.

We design and build the complete project including foundations, swimming pool and pool hall to meet your exact needs and the style of your home and garden. In some cases, the external finish of your pool building will be in the same materials as your dwelling as is sometimes required by the local authority during the planning application process.

mind and body

Swimming is one of the finest low impact exercises for your body and an excellent way to lose weight and gain fitness. With your own pool you can swim 365 days a year and by adding a gymnasium or spa there's no need to drive to a health club – you have all you need in your garden.

Your Pinelog pool is also a wonderful place to unwind and relax, away from the cares of the world. You can't beat unwinding in a luxurious pool – a perfect end to every day.

fun for everyone

No matter what our unpredictable weather brings, Pinelog indoor pools create the ideal opportunity for bringing family and friends together to have fun and relax in an attractive environment.

Swimming is an activity for all the family – one which people of all ages and fitness levels can enjoy. Children of course just love splashing around in water. You can also extend your living space and improve your quality of life at the same time.

design & build

We provide a full in-house design service to create a swimming pool to suit every garden and blend in with your home. Our experienced team will guide you in every step of the building process, easing your project through to completion.

As this brochure illustrates, our buildings can have a traditional external finish such as brick, stone or block and render to match the dwelling, with the roof design also in keeping with surrounding buildings.

We have worked with specialists to develop a range of hydrotherapy pools with the facilities to ensure that users derive all the emotional and physical benefits of hydrotherapy treatments. These pools are suited to customers' individual needs and requirements incorporating upgraded pool equipment, hand rails, non-slip tiles and in some cases hoists.

individual touches

The finishing touches really make a difference. If you would like a specially designed tiled floor; a beautiful tiled motif in the pool, changing rooms, sauna, steam room or fibre optic lighting, just let us know – the possibilities are endless. Our designers will ensure that your requirements will not only be met, but your expectations exceeded.

a promise is a promise

For over 30 years, Pinelog has been designing, manufacturing and installing the finest commercial and private indoor swimming pools for clients nationwide.

We take our clients' aspirations and add our own ideas and experience so that we can provide you with an exceptional and individual indoor swimming pool. The complete project will be run by our professional contract management team throughout the construction, taking away any worries you may have.

We look forward to working with you to capture your dream.
