

Sherwood Indoor
Swimming Pool
from Pinelog

The Sherwood Pool House

The striking Sherwood indoor swimming pool, conceived from the traditional rural style timber frame barn, is clad externally in natural larch, which can be finished in an array of contemporary colours.

The high level of insulation, both to the building and the swimming pool chamber, conform to the latest Building Regulation standards. This energy efficient building, with low running costs, will provide you and your family with a comfortable and relaxing environment all year round, whatever the British weather throws at us from outside!

The standard Sherwood design can be modified in a number of ways, with the addition of attractive features such as a fully glazed gable allowing sunlight to flood into the building, or extending the roofline to create a covered area, perhaps for a hot tub or dining alfresco.

Relax... we've got it all covered

Our exclusive all-inclusive packages mean that our experienced design and build team take care of everything to create a swimming pool to perfectly match your requirements and personal style.

Having carried out a site survey to ensure that your requirements are incorporated into the design, we prepare architect's drawings and a planning application to your local authority (when this is necessary).

We then complete the foundations, erect the pool hall, install the swimming pool, filtration equipment, heating, lighting, dehumidification and flooring before final commissioning – all with minimal disruption to your daily routine.

As the building is pre-manufactured at our Derbyshire factory, construction is completed quickly leaving you with a beautiful swimming pool built to last for decades.

It's as simple and stress free as that.
